

Illuminated Electronics Display End Cap

Wilson Display's Illuminated Electronics End Cap is designed to present three tablets/cell phones on a secure wood shelf. Display is mounted to an existing gondola and includes a large, customizable, backlit panel.

Features

- Powdercoated metal base and frame with melamine back panel. Unit accepts a dura trans graphic panel and a clear 1/8" acrylic protective panel (graphic panel not included)
- Integrated edge-lit LED panel (domestic or off-shore options)
- High gloss white PLAM (colour core) shelf with locking under cabinet and security equipment
 - Cabinet has 2 side doors with electronic keys for inventory storage and access to security equipment.
 - Same electronic key unlocks tablets/phones on display
 - Cabinet face includes 1" metal slat wall front panel with 4" hooks used to merchandise accessories
 - Once assembled, shelf and cabinet are locked in place
- Security system provides a compact, lightweight open-air cable and small sensors to deliver security as well as an unmatched customer experience. Micro USB charging capability is built into the units
- Material colours can be customized
- Unit is individually packaged and requires some on-site assembly to attach to gondola, connect power, secure the shelf and add a customized graphic panel
